PRESS RELEASE

UKSIF welcomes Environmental Audit Committee report on The Green Investment Bank
It calls for a ‘fully fledged’ bank able to borrow money and raise further capital

London, 11 March 2011 – The report, released today, highlights the urgent need for a robust, fit-for-purpose Green Investment Bank with the ability to raise private capital. The report reiterates UKSIF’s view that the Bank should have the ability to issue bonds which would offer an effective means for it to raise funds rapidly and at scale from institutional investors.

Last month, UKSIF convened a letter signed by Chief Executives and other senior figures from major UK investment institutions welcoming the creation of a UK Green Investment Bank and calling for it to have sufficient scale and government support.

Penny Shepherd MBE, UKSIF Chief Executive, said: “As our investor letter suggested, there is strong investor appetite for a Green Investment Bank able to significantly stimulate the UK’s green economy. The Government could miss a vital opportunity to meet climate change and renewable energy targets if it fails to deliver a Green Investment Bank capable of delivering the scale of investment required.”
